Projects

2023/06 – 2023/07   **Graduation Project: Web application for displaying data of Satellite**
- A web application that allows you to know everything about the project from hardware to a real live video stream captured by ESP32-Cam attached to a Rover and a Satellite prototype.
- Contains 3D objects made with R3F and React spring.
- The main project is a Satellite prototype so the website is just an additional feature.
- Was made with React-Vite, Tailwind.css and R3F to render 3D objects such as Satellite, Satellite dish and Rover.

My Reads:A Book Tracking App ⬈
A web application that allows you to select and categorize books you have read, are currently reading, or want to read.
